

ReCiPSS

Learnings from the implementation of Circular Business Models in the European Manufacturing Industry and the way forward

Are you interested in learning about

- How the Automotive industry is becoming more circular by implementing **Core Management as a Service to enable Remanufacturing?**
- How the White Goods industry is becoming more circular by implementing **Pay-Per-Use business models?**
- How different **circular methods and tools** can help companies in their transition from a linear to a circular economy?
- How innovative **IT solutions** are enabling companies to become more circular?
- The **technical and legal challenges** that companies face when implementing circular business models?

Join us for **ReCiPSS Day** on 16 November 2022 from 13:00-17:00 CET to listen to interesting presentations from ReCiPSS partners who will share their experiences and learnings from the implementation of the ReCiPSS project. Circular Economy Solutions GmbH (C-ECO) will present their results on developing and offering a novel **Core Management as a Service to enable Remanufacturing** in the automotive sector. C-ECO is a spin-off of Robert Bosch GmbH and operates independently since 2016. The White Goods manufacturer Gorenje, a company of the Hisense Europe group, will present the lessons learnt from developing and offering a **Pay-Per-Use Laundry Solution** for B2B and B2C. In addition, the ReCiPSS partners will highlight the challenges and opportunities faced during the implementation of large-scale demonstrators of circular business models.

Date and time: 16 Nov 2022 at 13:00-17:00 CET (13:00-16:00 project presentations, 16:00-17:00 Networking)

Venue: Room E3, Osquars backe 14, 114 28 Stockholm KTH main campus (for online participation a separate zoom link will be sent after registration)

Registration: [Click here to register](#)
